End Sem Examination Dec-2023

EN3BS14 / BC3BS04 Engineering Chemistry

Programme: B.Tech./ B.Sc.

Branch/Specialisation: All

Duration: 3 Hrs.**Maximum Marks: 60**

Note: All questions are compulsory. Internal choices, if any, are indicated. Answers of Q.1 (MCQs) should be written in full instead of only a, b, c or d. Assume suitable data if necessary. Notations and symbols have their usual meaning.

- Q.1 i. Which type of lubricant is often used in high temperature applications 1
such as ovens and kilns?
(a) Silicone (b) Graphite (c) Molybdenum disulfide (d) PTFE
- ii. A high viscosity index indicates that a lubricant- 1
(a) Becomes thinner at higher temperatures
(b) Maintains a more consistent viscosity over a range of temperatures
(c) Is better suited for cold weather applications
(d) Contains fewer additives
- iii. What is the primary purpose of vulcanizing rubber? 1
(a) To soften the rubber (b) To strengthen and harden the rubber
(c) To dissolve the rubber (d) To color the rubber
- iv. Bakelite is a thermosetting plastic, which means it- 1
(a) Can be easily melted and reshaped
(b) Cannot be remelted or reshaped once set
(c) Is derived from natural rubber
(d) Is highly biodegradable
- v. Graphene is a single layer of carbon atoms arranged in a- 1
(a) Hexagonal lattice (b) Cubic lattice
(c) Random lattice (d) Linear lattice
- vi. Nanowires are often used in the development of- 1
(a) Electronic and photonic devices
(b) Heavy machinery
(c) Building construction
(d) Agricultural equipment
- vii. The Beer-Lambert Law relates which two parameters in spectroscopy? 1
(a) Temperature and pressure (b) Volume and mass
(c) Wavelength and frequency (d) Absorbance and concentration

- viii. Which branch of spectroscopy is primarily concerned with studying 1
electronic excitation processes?
(a) NMR spectroscopy (b) Infrared spectroscopy
(c) UV-Vis spectroscopy (d) X-ray spectroscopy
- ix. In a spontaneous chemical reaction at constant temperature and 1
pressure, the change in Gibbs free energy (ΔG) is-
(a) Positive (b) Negative (c) Zero (d) Constant
- x. What is the primary environmental factor that often contributes to the 1
corrosion of metals?
(a) High humidity (b) Low humidity
(c) High pressure (d) High temperature

- Q.2 i. Define Aniline point. Write the significance of it. 4
ii. Define lubricants. Write a detail note on classification of lubricants. 6
OR iii. Define lubrication. Write a comparative note on different mechanism of 6
lubrication.
- Q.3 i. Write difference between Natural rubber and Synthetic rubber. 4
ii. Define polymer. Write a detail note on classification of Polymer. 6
OR iii. Write short note on- 6
(a) Teflon (b) Biodegradable polymers
- Q.4 i. Write the applications of Fullerenes. 4
ii. What are the superconductors? Write the properties and applications of 6
superconductors.
OR iii. What are the optical fibers? Write the properties and applications of 6
optical fibers.
- Q.5 i. Define Spectroscopy. Write about the electromagnetic spectrum. 4
ii. Write about the types of molecular vibrations. Write the applications of 6
IR spectroscopy in detail.
OR iii. Define chromatography. Write about the instrumentation and 6
applications of gas chromatography.
- Q.6 i. Write difference between enthalpy and entropy. 4
ii. Define EMF. Write the applications of EMF in detail. 6
OR iii. What is corrosion? Write about the types of it. How it can be 6
prevented?

Marking Scheme

Engg Chemistry EN3BS14

| | | | | |
|-----|-------|---|------------------------|----------|
| Q.1 | i) | b) Graphite and c) Molybdenum disulfide | | 1 |
| | ii) | b) Maintains a more consistent viscosity over a range of temperatures | | 1 |
| | iii) | b) To strengthen and harden the rubber | | 1 |
| | iv) | b) Cannot be remelted or reshaped once set | | 1 |
| | v) | a) Hexagonal lattice | | 1 |
| | vi) | a) Electronic and photonic devices | | 1 |
| | vii) | d) Absorbance and concentration | | 1 |
| | viii) | c) UV-Vis spectroscopy | | 1 |
| | ix) | a) Positive | | 1 |
| | x) | a) High humidity | | 1 |
| Q.2 | i. | Define Aniline point. | 2 Marks | 4 |
| | | Significance of it. | 2 Marks | |
| | ii. | Define lubricants. | 1 Mark | 6 |
| OR | | Classification of lubricants. | 5 Marks | |
| | iii. | Define lubrication. | 1 Mark | 6 |
| | | Comparative lubrication.- | 5 Marks | |
| Q.3 | iv. | Difference Synthetic rubber. | 4 Marks | 4 |
| | v. | Define polymer. | 1 Mark | 6 |
| | | Classification of Polymer.- | 5 Marks | |
| OR | vi. | a) Teflon | 3 Marks | 6 |
| | | b) Biodegradable polymers | 3 Marks | |
| Q.4 | i. | Applications of Fullerenes.- | 4 Marks | 4 |
| | ii. | What are the superconductors | 1 Mark | 6 |
| | | Write the properties and applications of superconductors. | 2.5 Marks 2.5 Marks | |
| OR | iii. | What are the optical fibers | 1 Mark | 6 |
| | | Write the properties and applications of optical fibers. | 2.5 Marks 2.5 Marks | |
| Q.5 | i. | Define Spectroscopy. | 2 Marks | 4 |
| | | Electromagnetic spectrum.- | 2 Marks | |
| | ii. | Types of molecular vibrations. | 3 Marks | 6 |

| | | | | |
|-----|------|--|------------------------|----------|
| OR | iii. | Applications of IR spectroscopy. | 3 Marks | |
| | | Define Chromatography. – | 1 Mark | 6 |
| | | Write about the instrumentation and applications of Gas chromatography.- | 2.5 Marks 2.5 Marks | |
| Q.6 | i. | Difference between Enthalpy and Entropy.- | 4 Marks | 4 |
| | ii. | Define EMF. | 1 Mark | 6 |
| OR | iii. | Write the applications of EMF in detail.- | 5 Marks | |
| | | What is corrosion | 1 Mark | 6 |
| | | Write about the types of it. | 2.5 Marks | |
| | | How it can be prevented.- | 2.5 Marks | |
