

Total No. of Questions: 6

Total No. of Printed Pages:3

Enrollment No.....

Faculty of Science

End Sem (Odd) Examination Dec-2022

BC3EP04 Quantum Mechanics & Spectroscopy

Programme: B.Sc.

Branch/Specialisation: Computer  
Science

Duration: 3 Hrs.

Maximum Marks: 60

Note: All questions are compulsory. Internal choices, if any, are indicated. Answers of Q.1 (MCQs) should be written in full instead of only a, b, c or d.

- Q.1 i. In the Compton scattering, the increase in wavelength depends on- 1  
(a) The Wavelength of the incident radiation  
(b) Nature of scatterer  
(c) Angle of scattering  
(d) None of these
- ii. The velocity of matter wave is- 1  
(a)  $c$  (b)  $v$  (c)  $c^2/v$  (d)  $c/v$
- iii. The Quantity  $|\Psi|^2$  represents- 1  
(a) Probability density (b) Charge density  
(c) Energy density (d) Intensity of wave
- iv. The wave function associated with a material particle is- 1  
(a) Only finite  
(b) Only continuous  
(c) Only single valued  
(d) Finite, single valued and continuous
- v. The expectation value of potential energy of hydrogen atom is- 1  
(a) Zero (b) -13.6 eV (c) -27.2 eV (d) 13.6 eV
- vi. A particle of energy  $E$  is incident on a potential step of finite width 1  
and height  $V_0$ . If  $E \leq V_0$ , then-  
(a)  $R=0$ ,  $T=1$  (b)  $R=1$ ,  $T=0$   
(c)  $R=0.5$ ,  $T=0.5$  (d)  $R=0.16$ ,  $T=0.84$
- vii. The values of  $L$ ,  $S$  and  $J$  in the ground state of sodium atom are- 1  
(a)  $L=0$ ,  $S=1/2$ ,  $J=1/2$  (b)  $L=0$ ,  $1, 2$   $S=1$ ,  $J=3/2, 1$   
(c)  $L=1$ ,  $S=1/2$ ,  $J=1/2, 3/2$  (d)  $L=2$ ,  $S=1/2$ ,  $J=3/2$

P.T.O.

[2]

- viii. The maximum number of electrons in a shell of principal quantum number  $n$  is- **1**  
 (a) 2 (b)  $2n$  (c)  $2n^2$  (d) 8
- ix. The mass number of a nucleus is equal to- **1**  
 (a) The number of electrons in it  
 (b) The number of protons in it  
 (c) The number of neutrons in it  
 (d) The number of nucleons in it
- x. Nuclear forces are- **1**  
 (a) Gravitational attractive  
 (b) Electrostatic repulsive  
 (c) Long range and strong attractive  
 (d) Short range and strong attractive
- Q.2 i. Write four differences between electromagnetic waves and matter waves. **2**  
 ii. What is photoelectric effect? Write down the photoelectric equation and explain the meaning of symbols used. **3**  
 iii. Define phase velocity and group velocity and establish relation between them. **5**
- OR iv. Explain Heisenberg's uncertainty principle and derive it. **5**
- Q.3 i. Write the four properties of wave function. **2**  
 ii. Derive time dependent and time independent wave equation. **8**
- OR iii. A particle of mass  $m$  is enclosed in a one-dimensional box of length  $l$ . Show that the energy of a particle in a box is given by the following relation:  $E_n = n^2 h^2 / 8ml^2$ . **8**
- Q.4 i. Write the energy Eigen values and the Schrödinger's equation for a linear harmonic Oscillator. Draw the diagram for its energy levels. **3**  
 ii. Write down the Schrödinger wave equation for the particle incident on a rectangular potential barrier and solve it. **7**
- OR iii. Show that the degeneracy of  $n^{\text{th}}$  energy state of hydrogen atom is  $2n^2$ . **7**

[3]

- Q.5 i. Deduce energy of electron in  $n^{\text{th}}$  orbit. **4**  
 ii. Explain the fine structure of  $H_\alpha$  line on the basis of vector atom model. **6**
- OR iii. What is meant by L-S coupling? Give example. **6**
- Q.6 Attempt any two:  
 i. What is binding energy? Draw the binding energy curve? What important information do you obtain from the binding energy curve? **5**  
 ii. Discuss shell model. **5**  
 iii. Explain the working of cyclotron with neat diagram and give its limitations. **5**

\*\*\*\*\*

**Marking Scheme(BC3EP04 Quantum Mechanics and Spectroscopy)**

i. In the Compton Scattering, the increase in Wavelength depends on:

1

(c) Angle of scattering

ii The velocity of matter wave is:

1

(b)  $c^2/v$

iii The Quantity  $|\Psi|^2$  represents:

1

1

(a) Probability density

iv The wave function associated with a particle is:

1

(d) Finite, continuous and single valued

v The expectation value of potential energy of hydrogen atom is:

1

(c) -27.2 eV

vi A particle of energy E is incident on a potential step of finite width and height  $V_0$ .

If  $E \leq V_0$ , then:

1

(b)  $R=1$ ,  $T=0$

vii The values of L, S and J in the ground state of sodium atom are:

1

1

(b)  $L=0$ ,  $S=1/2$ ,

$J=1/2$

viii The maximum number of electrons in a shell of principal quantum number n is:

1

$2n^2$

(b)

ix The mass number of a nucleus is equal to:

1

(d) The number of nucleons in it

x Nuclear forces are:

1

(d) Short range and strong attractive

Q. 2 i) Write four differences between Electromagnetic waves and matter Waves.

2 marks

0.5 mark for each

(0.5 mark \* 4=2)

ii) Definition of Photoelectric effect.

1.5 marks

Explanation of the photoelectric equation.

1.5 marks

iii) Definition of  $v_p$  &  $v_g$ .

1 mark

Relation between  $v_p$  &  $v_g$ .

4 marks

iv) Statement of Heisenberg's uncertainty principle.

1 mark

Derivation for Heisenberg's uncertainty principle.

4 marks

Q.3 i) Four properties of wave function.

2 marks

0.5 mark for each

(0.5 mark \* 4=2)

ii) Basic postulates of Quantum mechanics.

8 marks

iii) Full derivation for energy of the particle.

8 marks

Q.4 i) Energy Eigen values and the Schrödinger's equation for a linear harmonic

Oscillator.

1 mark

Diagram of energy levels.

2 marks

ii) Schrödinger wave equation for the particle incident on a rectangular potential barrier and its solution

7 marks

iii) Show that the degeneracy of  $n^{\text{th}}$  energy state of hydrogen atom is  $2n^2$ .

7 marks

Q.5 i) Derivation for electron's energy in  $n^{\text{th}}$  orbit.

4 marks

ii) Fine structure of  $H_\alpha$  line on the basis of vector atom model

6 marks

iii) Meaning of L-S coupling.

2 marks

Explanation with example.

4 marks

Q.6 i) What is binding energy?

1 mark

Draw the binding energy curve?

2 marks

What important information do you obtain from the binding energy curve?

2 marks

ii) Discussion of shell model.

5 marks

iii) Cyclotron diagram.

1 mark

Cyclotron working.

4 marks
